

# VECTOR<sup>™</sup> provides options that fit your budget and needs

Regardless of the size of your company or budget, Estimating Edge<sup>®</sup> has options that can help your takeoff and estimating needs.

## BASIC

### 2D Quantity Takeoff

Easy to use, professional-grade solution for small projects.

Measure (area, length and count) a plan and quickly get the details you need. Quantities are displayed on the screen so you can manually transfer to Microsoft<sup>®</sup> Excel<sup>®</sup> or an estimating solution of your choice.

Estimating Capabilities:  
Manual

## ESSENTIAL

### 2D Quantity Takeoff & Estimating

Everything you need for quantity takeoff and estimating.

Designed for multi-users who need to share assemblies and jobs. Customize assemblies, get volume calculations, price inside VECTOR and access pre-defined reports.

Don't want to use VECTOR for estimating? Export material details and labor costs to a solution of your choice.

Estimating:  
Full capabilities within the product

## MOST POPULAR

## PROFESSIONAL

### Automated Quantities from 3D Models, 2D Quantity Takeoff & Estimating Solution

Looking for the next-gen technology in takeoff?

Extracts 3D models so you can focus on estimating instead of performing a takeoff. With robust capabilities you can customize assemblies, and even calculate volume. Estimating is done within VECTOR and includes pre-defined reports that can be modified and saved.

Would you rather use a commercial-grade estimating solution like The EDGE<sup>®</sup>? VECTOR seamlessly integrates. You'll wonder how you ever estimated without it.

Estimating:  
Full capabilities within the product and integration with The EDGE

\*User has the option to pay monthly or annually. Essential and Professional packages require an annual contract.
